CREST Olympiads is one of the largest Olympiad Exams with students from more than 60 countries. The objective of these exams is to build a competitive spirit while evaluating students on conceptual understanding of the concepts.

We strive to provide a superior learning experience, and this workbook is designed to complement the school studies and prepare the students for various competitive exams including the CREST Olympiads. This workbook provides a crisp summary of the topics followed by the practice questions. These questions encourage the students to think analytically, to be creative and to come up with solutions of their own. There is a previous year's paper given at the end of this workbook for the students to attempt after completing the syllabus. This paper should be attempted in 1 hour to get an assessment of the student's preparation for the final exam.

# Series Completion and Inserting the Missing Character

Series completion and inserting missing character is a topic under logical reasoning which deals with questions which judge our guessing capabilities and techniques. The better we understand the relation or logic between the given entities, the easier and quicker it becomes for us to solve such questions.

The student needs to predict the next term in the given series or the missing term in the series. This series can be of numbers, alphabets, letters or images.

**Example 1:** Select the figure which will come next in the following series:

- a.
- b.
- c.
- d.

**Solution 1:** a

The circle is filled and hollow in every alternate step, so the upcoming step will be a filled circle. The triangle at the left bottom gets rotated by 90 degrees in the clockwise direction in the first step. In the second step, the triangle at the right top gets rotated by 90 degrees in the clockwise direction and the lower triangle remains constant. This rotation continues in every alternate step. Hence, option (a) is the next image in the series.

**Example 2:** A series is given below, with one term missing in it. Choose the correct alternative from the given ones that will complete the series:  
TDE, RGG, PJI, ? , LPM

- a. MNK
- b. MKN
- c. NMK
- d. NKM

**Solution 2:** c

The logic followed here is as follows:

$$\begin{array}{ccccccc} T & \xrightarrow{-2} & R & \xrightarrow{-2} & P & \xrightarrow{-2} & N & \xrightarrow{-2} & L \\ D & \xrightarrow{+3} & G & \xrightarrow{+3} & J & \xrightarrow{+3} & M & \xrightarrow{+3} & P \\ E & \xrightarrow{+2} & G & \xrightarrow{+2} & I & \xrightarrow{+2} & K & \xrightarrow{+2} & M \end{array}$$

Therefore, "NMK" is the missing term.

**Example 3:** Which number would replace question mark in the series?  
7, 12, 19, ?, 39

- a. 29
- b. 28
- c. 30
- d. 32

**Solution 3:** b

The given sequence follows the pattern: + 5, +7, +9 ... i.e., 7 + 5 = 12, 12 + 7=19  
Missing number = 19 + 9 = 28.  
Hence, the answer is (b).

**Example 4:** In following letter series, some of the letters are missing which are given in that order as one of the alternatives below it. Choose the correct alternative.  
b cab bc ab bca \_\_\_\_\_ bca

- a. bbca
- b. acba
- c. cabc
- d. cacc

**Solution 4:** a

We can observe that pattern bcab is repeated.  
Hence, option (a) is correct.
