Worksheet on Money

1. How much would it cost to purchase five sets of tableware if each set includes plates priced at £56, bowls at £19, cups at £12, and spoons at £7?

- a. £47
b. £94
c. £470
d. £940
2. A cardboard box consisting of 40 oranges. If the cost of an orange is ¥1.5, What is the cost of eight cardboard boxes?

- a. ¥120
b. ¥240
c. ¥480
d. ¥540
3. The price of a 70 kg barley is £980. What is the price of 15 kg of barley?

- a. £200
- b. £210
- c. £230
- d. £280

4. If the cost of a bucket is \$7.5, what is the cost of four fewer buckets than the bucket given below?

- a. \$87.5
- b. \$97.5
- c. \$107.5
- d. \$117.5

5. The cost of a grater is \$42 more than the cost of a spatula and the cost of a knife is \$46 less than the cost of a grater. What is the amount paid for these items if the cost of a spatula is \$17?

- a. \$89
- b. \$98
- c. \$99
- d. \$108

Answer Key

1. c - £470

Explanation: Cost of plates = £56

Cost of bowls = £19

Cost of cups = £12

Cost of spoons = £7

Total cost of each set = £56 + £19 + £12 + £7 = £94

Amount paid for the five sets of these items = £94 × 5 = £470

2. c - ¥480

Explanation: Number of oranges in one cardboard box = 40 oranges

Number of oranges in eight cardboard boxes = 40 × 8 = 320 oranges

Cost of an orange = ¥1.5

Cost of 8 cardboard boxes (320 oranges) = ¥1.5 × 320 = ¥480.

3. b - £210

Explanation: Price of 70 kg of barley = £980

Price of 1 kg of barley = £980 ÷ 70 = £14

Price of 15 kg of barley = £14 × 15 = £210

4. b - \$97.5

Explanation: Cost of 1 bucket = \$7.5

Number of four fewer buckets than the given buckets = 17 - 4 = 13

Cost of 13 buckets = \$7.5 × 13 = \$97.5

5. a - \$89

Explanation: Cost of a spatula = \$17

Cost of a grater is \$42 more than the cost of a spatula = \$17 + \$42 = \$59

Cost of a knife is \$46 less than the cost of a grater = \$59 - \$46 = \$13

Amount paid for these items = \$17 + \$59 + \$13 = \$89
